PROFESSIONAL SUMMARY

Electronics and Communication Engineering undergraduate passionate about software engineering and solving real-world problems through technology. Hands-on experience in developing AI-powered applications using Python, supported by strong analytical thinking and a continuous learning mindset. Eager to contribute to innovative software projects by writing clean, reliable code, adapting quickly to new technologies, and collaborating effectively to deliver business value.

EDUCATION

- MADRAS INSTITUTE OF TECHNOLOGY** 2027
B.E ELECTRONICS AND COMMUNICATION CGPA: 7.92
- ELITE MAT.HEC.SEC SCHOOL** 2023
STATE BOARD Percentage: 93.17

TECHNICAL SKILLS AND INTERESTS

Languages: Python, SQL, C++, Verilog

Developer Tools: Git, GitHub, VS Code

Engineering Tools: MATLAB, KiCad, LTspice

Frameworks: Pandas

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Effective Communication, Adaptability, Time Management

PROJECTS

- AI Mock Interview Assistant** June 2026
Developed an AI-powered mock interview application that generates personalized technical based on user skills and resumes, and provides instant feedback on responses
 - Tools & technologies used: Python, gradio, OpenAI API, Speech Recognition, FPDF2, Git, GitHub
 - Enabled users to practice realistic interview scenarios, receive AI-driven performance feedback, and improve their communication and technical interview readiness
- PDF RAG Assistant** June 2026
Developed an AI-powered Retrieval-Augmented Generation (RAG) application that allows users to upload PDF documents and ask context-based questions using semantic search and LLMs
 - Tools & technologies used: Python, Streamlit, LangChain, FAISS, Hugging Face Embeddings, OpenAI API, PyPDF2, Git, GitHub
 - Enabled accurate question answering from PDF content, reducing irrelevant responses and providing users with an interactive document assistant for efficient information retrieval
- Secure Voice and Data Communication System Using Encryption** Mar 2025
Developed a secure communication system for transmitting voice and text data using encryption techniques to ensure confidentiality and reliability
 - Tools & technologies used: MATLAB, AES Encryption, Signal Processing
 - Implemented secure data transmission and analyzed system performance, strengthening understanding of encryption and digital communication systems

EXPERIENCE

- JPMorgan Chase & Co. – Quantitative Research Virtual Experience** June 2026
 - Completed a quantitative research simulation focused on credit risk analysis and probability of default modeling
 - Analyzed loan portfolios to estimate customer default probabilities using financial data and used dynamic programming to optimize FICO score bucketing for predictive modeling and risk assessment
- Deloitte Australia – Data Analytics Job Simulation (Forage)** June 2026
 - Completed a Deloitte job simulation involving data analysis and forensic technology
 - Created a data dashboard using Tableau and used Excel to classify data and draw business conclusions

COURSEWORK

- System Design Through Verilog – NPTEL** Learned digital system design concepts, combinational and sequential circuits, and hardware implementation using Verilog HDL
- MATLAB Onramp – MathWorks** Gained hands-on experience in MATLAB programming, data visualization, numerical computing, and basic engineering simulations
- Solved 130+ problems in leetcode and geeksforgeeks.
